

INDEX TO VOLUME XXI

SUBJECTS.

| | PAGE |
|---|------|
| ABBE, ERNST - - - - - | 379 |
| ABSORPTION Spectra, Dispersion Bands in. <i>W. H. Julius</i> - - - | 271 |
| AIR, Conditions Attending Appearance of Argon Lines in. <i>A. S. King</i> - | 344 |
| ALKALINE-Earth Fluorides in Electric Arc, On Spectra of. <i>Ch. Fabry</i> - | 356 |
| ANOMALOUS Dispersion, Spectroheliographic Results Explained by. <i>W. H. Julius</i> - - - - - | 278 |
| ARC, On Spectra of Alkaline-Earth Fluorides in Electric. <i>Ch. Fabry</i> - | 356 |
| Spectrum of Strontium, Additional Triplets in. <i>A. Fowler</i> - - - | 81 |
| ARGON Lines in Air, Conditions Attending Appearance of. <i>A. S. King</i> - | 344 |
| ASTROPHYSICAL Journal, Grant by Smithsonian Institution to. - - - | 81 |
| ATMOSPHERE, "Optical Power" of, and its Measurement. <i>Karl Exner</i> and <i>W. Villiger</i> - - - - - | 368 |
| Radiation Through a Foggy. <i>Arthur Schuster</i> - - - - - | I |
| Temperature of the Solar. <i>Arthur Schuster</i> - - - - - | 258 |
| ϵ Aurigae, Polaris, η Piscium, and β Orionis, On Radial Velocities of. <i>W. W. Campbell</i> and <i>Heber D. Curtis</i> - - - - - | 191 |
| BANDS in Absorption Spectra, Dispersion. <i>W. H. Julius</i> - - - - | 271 |
| In the Spectra of δ Orionis and Nova Persei, Dispersion. <i>W. H. Julius</i> - - - - - | 286 |
| BOOKS Received - - - - - | 295 |
| BRUCE Photographic Telescope of Yerkes Observatory. <i>E. E. Barnard</i> - | 35 |
| CALCIUM and Strontium, Narrow Triplets in Spectra of. <i>F. A. Saunders</i> - | 195 |
| CAPACITY and Self-induction upon Wave-Length in Spark Spectrum, Effect of. <i>George W. Middlekauff</i> - - - - - | 116 |
| CARNEGIE Institution of Washington, Solar Observatory of. <i>George E. Hale</i> - - - - - | 151 |
| COMET 1903 IV, Motion of Matter Composing Tail of. <i>R. Jaegermann</i> - | 323 |
| CORONA, On Comparative Luminosity and Total Radiation of Solar. <i>S. P. Langley</i> - - - - - | 194 |
| DISPERSION Bands in Absorption Spectra. <i>W. H. Julius</i> - - - - | 271 |
| Bands in Spectra of δ Orionis and Nova Persei. <i>W. H. Julius</i> - - - | 286 |
| Spectroheliographic Results Explained by Anomalous. <i>W. H. Julius</i> - | 278 |
| ELECTRIC Oven, Some Emission Spectra of Metals as Given by. <i>A. S. King</i> - | 236 |
| EMISSION Spectra of Metals as Given by an Electric Oven. <i>A. S. King</i> - | 236 |
| ENHANCED Lines of Iron, Titanium and Nickel. <i>F. E. Baxandall</i> - - - | 337 |
| FLUORIDES in Electric Arc, On Spectra of Alkaline-Earth. <i>Ch. Fabry</i> - | 356 |
| FOGGY Atmosphere, Radiation Through. <i>Arthur Schuster</i> - - - - | I |

| | PAGE |
|--|------|
| GLASS and Silvered Glass Mirrors, Some New Determinations of Reflecting Powers. <i>C. A. Chant</i> - - - - - | 211 |
| GRATING Spectra, Intensity of. <i>R. W. Wood</i> - - - - - | 173 |
| HIGH-Temperature Radiation. <i>P. G. Nutting</i> - - - - - | 400 |
| INTERRUPTER, Spectra from Wehnelt. II. <i>Harry W. Morse</i> - - - | 223 |
| IRON, Titanium and Nickel, On Enhanced Lines of. <i>F. E. Baxandall</i> - | 337 |
| LUMINESCENCES, Spectra of Weak. <i>Harry W. Morse</i> - - - - 83, | 410 |
| MAGNESIUM, On Spectrum of. <i>James Barnes</i> - - - - - | 74 |
| MAGNETIC Disturbances, Solar Origin of Terrestrial. <i>E. Walter Maunder</i> | 101 |
| MATTER Composing Tail of Comet 1903 IV, Motion of. <i>R. Jaegermann</i> - | 323 |
| McMILLIN Observatory, Observations of Radial Velocities of Thirty-one Stars Made at the Emerson. <i>H. C. Lord</i> - - - - - | 297 |
| METALS as Given by an Electric Oven, Some Emission Spectra of. <i>A. S. King</i> - - - - - | 236 |
| MIRRORS, Some New Determinations of Reflecting Powers of Glass and Silvered Glass. <i>C. A. Chant</i> - - - - - | 211 |
| MONOCHROMATIC Photographs of the Orion Nebula. <i>J. Hartmann</i> - | 389 |
| MOON'S Spectrographic Velocity near Full Moon, Computation of. <i>R. H. Curtiss</i> - - - - - | 376 |
| MOTION of Matter Composing Tail of Comet 1903 IV. <i>R. Jaegermann</i> - | 323 |
| MT. WILSON, California, Study of Conditions for Solar Research at. <i>George E. Hale</i> - - - - - | 124 |
| NICKEL, On Enhanced Lines of Iron, Titanium and. <i>F. E. Baxandall</i> - | 337 |
| <i>Nova Persei</i> , Dispersion Bands in Spectra of δ Orionis and. <i>W. H. Julius</i> - | 286 |
| OBSERVATORY of Carnegie Institution of Washington, Solar. <i>George E. Hale</i> - - - - - | 151 |
| "OPTICAL Power" of the Atmosphere and its Measurement. <i>Karl Exner</i> and <i>W. Villiger</i> - - - - - | 368 |
| OPTICS of the Spectroscope. <i>Arthur Schuster</i> - - - - - | 197 |
| δ Orionis and <i>Nova Persei</i> , Dispersion Bands in Spectra of. <i>W. H. Julius</i> | 286 |
| β Orionis, <i>Polaris</i> , η Piscium, and ϵ Aurigæ, On Radial Velocities of. <i>W. W. Campbell</i> and <i>Heber D. Curtis</i> - - - - - | 191 |
| Orion Nebula, Monochromatic Photographs of. <i>J. Hartmann</i> - | 389 |
| OVEN, Some Emission Spectra of Metals as Given by an Electric. <i>A. S. King</i> . - - - - - | 236 |
| <i>Persei</i> , Dispersion Bands in the Spectra of δ Orionis and <i>Nova</i> . <i>W. H. Julius</i> - - - - - | 286 |
| PHOTOGRAPHS of the Orion Nebula, Monochromatic. <i>J. Hartmann</i> - | 389 |
| η Piscium, ϵ Aurigæ, β Orionis, and <i>Polaris</i> , On Radial Velocities of. <i>W. W. Campbell</i> and <i>Heber D. Curtis</i> - - - - - | 191 |
| <i>Polaris</i> , η Piscium, ϵ Aurigæ, and β Orionis, On Radial Velocities of. <i>W. W. Campbell</i> and <i>Heber D. Curtis</i> - - - - - | 191 |
| POTSDAM Observatory, Spectroheliograph of. <i>P. Kempf</i> - - - - | 49 |

| | PAGE |
|--|---------|
| POULKOVA, Determination of Radial Velocities at. <i>A. Bēlopolsky</i> - - | 55 |
| POWERS of Glass and Silvered Glass Mirrors, Some New Determinations of Reflecting. <i>C. A. Chant</i> - - - - - | 211 |
| RADIAL Velocities of Thirty-one Stars Made at Emerson McMillin Observatory, Observations of. <i>H. C. Lord</i> - - - - - | 297 |
| Velocities at Poulkova, On Determination of. <i>A. Bēlopolsky</i> - - | 55 |
| Velocities of <i>Polaris</i> , η <i>Piscium</i> , ϵ <i>Aurigae</i> , and β <i>Orionis</i> . <i>W. W. Campbell</i> and <i>Heber D. Curtis</i> - - - - - | 191 |
| Velocities Vary, List of Nine Stars Whose. <i>W. W. Campbell</i> and <i>Heber D. Curtis</i> - - - - - | 185 |
| Velocities Vary, List of Twelve Stars Whose. <i>W. H. Wright</i> - | 371 |
| Velocity of <i>Sirius</i> , Variable. <i>W. W. Campbell</i> - - - - | 176 |
| RADIATION, High-Temperature. <i>P. G. Nutting</i> - - - - | 400 |
| Through a Foggy Atmosphere. <i>Arthur Schuster</i> - - - - | 1 |
| REFLECTING Powers of Glass and Silvered Glass Mirrors, Some New Determinations of. <i>C. A. Chant</i> - - - - - | 211 |
| REVIEWS, See Table of Contents | |
| REVISION of Rowland's System of Standard Wave-lengths. <i>Lewis E. Jewell</i> - - - - - | 23 |
| ROWLAND'S System of Standard Wave-lengths, Revision of. <i>Lewis E. Jewell</i> - - - - - | 23 |
| RUMFORD Spectroheliograph, Observations with. <i>Philip Fox</i> - - | 351 |
| Spectroheliograph, The Work of. <i>George E. Hale</i> - - - - | 261 |
| SELF-induction Upon Wave-Length in Spark Spectrum, Effect of Capacity and. <i>George W. Middlekauff</i> - - - - - | 116 |
| SMITHSONIAN Institution, Grant to <i>Astrophysical Journal</i> - - - - | 81 |
| <i>Sirius</i> , The Variable Velocity of. <i>W. W. Campbell</i> - - - - | 176 |
| SOLAR Atmosphere, Temperature of. <i>Arthur Schuster</i> - - - - | 258 |
| Observatory of Carnegie Institution of Washington. <i>George E. Hale</i> | 151 |
| Origin of Terrestrial Magnetic Disturbances. <i>E. Walter Maunder</i> - | 101 |
| Research at Mt. Wilson, California. Study of Conditions for. <i>George E. Hale</i> - - - - - | 124 |
| SPARK Spectrum, Effect of Capacity and Self-induction Upon Wave-Length in. <i>George W. Middlekauff</i> - - - - - | 116 |
| SPECTRA, Dispersion Bands in Absorption. <i>W. H. Julius</i> - - - - | 271 |
| From Wehnelt Interrupter. II. <i>Harry W. Morse</i> - - - - | 223 |
| Of Alkaline-Earth Fluorides in Electric Arc. <i>Ch. Fabry</i> - - - - | 356 |
| Of Calcium and Strontium, Narrow Triplets in. <i>F. A. Saunders</i> - | 195 |
| Intensity of Grating. <i>R. W. Wood</i> - - - - - | 173 |
| Of Metals as Given by an Electric Oven, Some Emission. <i>A. S. King</i> | 23 |
| Of δ <i>Orionis</i> and <i>Nova Persei</i> , Dispersion Bands in. <i>W. H. Julius</i> - | 286 |
| Of Weak Luminescences. <i>Harry W. Morse</i> - - - - | 83, 410 |
| Stars Having Peculiar. <i>Edward C. Pickering</i> - - - - | 292 |

| | PAGE |
|---|------|
| SPECTROGRAPHIC Velocity Near Full Moon, Computation of Moon's. <i>R. H. Curtiss</i> | 376 |
| SPECTROHELIOGRAPHIC Results Explained by Anomalous Dispersion. <i>W. H. Julius</i> | 278 |
| SPECTROHELIOGRAPH Observations With Rumford. <i>Philip Fox</i> | 351 |
| Of Potsdam Observatory. <i>P. Kempf</i> | 49 |
| Work of the Rumford. <i>George E. Hale</i> | 261 |
| SPECTROSCOPE, The Optics of. <i>Arthur Schuster</i> | 197 |
| SPECTRUM, Effect of Capacity and Self-induction Upon Wave-Length in Spark. <i>George W. Middlekauff</i> | 116 |
| Of Argon, Appearance of, in Air. <i>A. S. King</i> | 344 |
| Of Magnesium. <i>James Barnes</i> | 74 |
| Of Strontium, Additional Triplets in Arc. <i>A. Fowler</i> | 81 |
| STANDARD Wave-Length, Revision of Rowland's System of. <i>Lewis E. Jewell</i> | 23 |
| STARS Having Peculiar Spectra. <i>Edward C. Pickering</i> | 292 |
| Whose Radial Velocities Vary, List of Nine. <i>W. W. Campbell and Heber D. Curtis</i> | 185 |
| STRONTIUM, Additional Triplets in Arc Spectrum of. <i>A. Fowler</i> | 81 |
| Narrow Triplets in Spectra of Calcium and. <i>F. A. Saunders</i> | 195 |
| TACCHINI, PIETRO | 387 |
| TELESCOPE, Bruce Photographic, of Yerkes Observatory. <i>E. E. Barnard</i> | 35 |
| TEMPERATURE of the Solar Atmosphere. <i>Arthur Schuster</i> | 258 |
| TERRESTRIAL Magnetic Disturbances, Solar Origin of. <i>E. Walter Maunder</i> | 101 |
| TITANIUM, Iron and Nickel, On Enhanced Lines of. <i>F. E. Baxandall</i> | 337 |
| TRIPLETS in Arc Spectrum of Strontium, Additional. <i>A. Fowler</i> | 81 |
| In Spectra of Calcium and Strontium, Note on Narrow. <i>F. A. Saunders</i> | 195 |
| VELOCITIES of <i>Polaris</i> , η <i>Piscium</i> , ϵ <i>Aurigæ</i> , and β <i>Orionis</i> , On the Radial. <i>W. W. Campbell and Heber D. Curtis</i> | 191 |
| Of Thirty-one Stars Made at the Emerson McMillin Observatory, Observations of Radial. <i>H. C. Lord</i> | 297 |
| On Determination of Radial, at Poulkova. <i>A. Bëlopolsky</i> | 55 |
| Vary, List of Nine Stars Whose Radial. <i>W. W. Campbell and Heber D. Curtis</i> | 185 |
| Vary, List of Twelve Stars Whose Radial. <i>W. H. Wright</i> | 371 |
| VELOCITY of <i>Sirius</i> , The Variable Radial. <i>W. W. Campbell</i> | 176 |
| Near Full Moon, Computation of the Moon's Spectrographic. <i>R. H. Curtiss</i> | 376 |
| WAVE-LENGTH in Spark Spectrum, Effect of Capacity and Self-induction Upon. <i>George W. Middlekauff</i> | 116 |
| WAVE-LENGTHS, Revision of Rowland's System of Standard. <i>Lewis E. Jewell</i> | 23 |
| WEHNELT Interrupter, Spectra from. II. <i>Harry W. Morse</i> | 223 |
| YERKES Observatory, Bruce Photographic Telescope of. <i>E. E. Barnard</i> | 35 |

INDEX TO VOLUME XXI

AUTHORS

| | PAGE |
|---|------|
| ADAMS, WALTER S. Review of: <i>Spectroscopic Observations of the Rotation of the Sun</i> , J. Halm - - - - - | 385 |
